

How the 9Ns5 wallets were funded

Base and Solana · USDC and Circle CCTP transfers · each arrow is a set of public transactions

Also into 9Ns5: \$1.68M through the unlabelled address 0x7e07...ff1f, which 0xb87f paid \$687k. 9Ns5 also bridged \$985k to all 60 AE2J wallets. Labels: DefiLlama's Limitless adapter (fee recipient, rewards distributor); limitless.exchange/token (multisigs), with owners and thresholds read on chain.

Source: out/a06_funding_chain_evidence.csv lists every transaction of the first three hops;
refs/sources/safe_owners.json holds the Safe snapshots; make pull rebuilds every hop.
