

The 120 9Ns5 wallets, week by week

order book · each row is one wallet, each column one week · 16 Feb to 27 Sep 2026

Rows 1 to 60 made their first trade on 18 Feb; rows 61 to 120 from 11 to 14 May, the week of the flash-loan wallets' last day of size. The first 60 went almost silent that same week. The 49 wallets that sent USDC back to 9Ns5 on 29 May to 2 Jun are all from the second 60. Every one of the 120 wallets traded as both maker and taker, with between 45% and 57% of its shares as maker. Weeks under 10,000 shares are blank; the partial week from 28 Sep 2026 is left out.
