

Road to Legend — Rules

Road to Legend is a gamified prediction campaign built around the 2026 FIFA World Cup, run by Limitless. By joining, you agree to follow the rules below.

How it works

1. **Create your player** — register and connect a wallet or log in via social.
2. **Earn XP** — complete quests (predictions, trades, streaks, social and referral actions, and more).
3. **Climb the leaderboard** — your total XP sets your rank and league.
4. **Get rewards** — earn a share of the prize pool through your leaderboard position and weekly challenges.

Quests & XP

You earn XP for each completed quest.

The active quests and their XP values are always shown on the Campaign page in the Limitless platform.

XP has no cash value — it only sets your position on the leaderboard.

Limitless may add, remove, or adjust quests and XP values during the Campaign. XP given in error or earned through manipulation can be removed.

Limitless rewards participation that genuinely supports its markets. The platform takes into account the overall quality and contribution of activity — including how it supports prices, liquidity and the health of the markets — and not volume on its own. Where activity adds little value of this kind, Limitless may, at its discretion, review how it is counted and recalculate the XP and standing it generates, so that the leaderboard stays fair and balanced for everyone.

Who counts as a Trader

A Trader is a participant who has made at least one trade of \$10 or more on Limitless. Trader count is what drives the size of the prize pool.

Prize pool

The prize pool has two parts:

1. **Main prize pool** — grows with the number of Traders. The more Traders join, the bigger it gets:

Traders	Main prize pool
Launch	100,000 USDC
100,000	220,000 USDC
200,000	350,000 USDC
300,000	400,000 USDC
300,000+	up to 1,000,000 USDC

The main pool is paid in USDC and capped at 1,000,000 USDC.

Daily update: the Trader count and the matching prize pool tier are recalculated once a day at 18:00 London time (Europe/London). Changes take effect at the next update — figures shown between updates are indicative.

- 2. **Weekly challenges** — extra weekly rewards on top of the main pool, with conditions that update each week (see below).

How rewards are paid

The main prize pool is split into two parts:

- **80% — by XP.** Distributed among the top 1,000 participants on the leaderboard, ranked by total XP. This part is grouped into rank tiers: each tier receives a fixed share of the 80% pool, and within each tier that share is distributed proportionally to XP — the more XP you hold relative to others in your tier, the larger your reward.

Rank tier	Leaderboard rank	Winners	Share of XP pool (80%)
1	1	1	6.7%
2	2–3	2	6.7%
3	4–10	7	11.7%
4	11–50	40	26.7%
5	51–200	150	25%
6	201–500	300	15%
7	501–1,000	500	8.3%
Total	1–1,000	1,000	100%

Shares are rounded; the total comes to approximately 100% of the 80% pool.

- **20% — random draw.** Distributed at random among 100 participants who have earned more than 500 XP.

Weekly challenges

On top of the main prize pool, there's a weekly challenge with its own reward and condition. The conditions update every week — the current week's challenge is always shown on the Campaign page in the Limitless platform and posted on our official X (Twitter) page.

All reward funds are sent to your smart wallet on Limitless.

Dates & payouts

The Campaign ends on 19 July 2026 at 22:00 London time (Europe/London).

Reward payouts are completed by 3 August 2026 (inclusive).

Fair play

Limitless is committed to keeping the Campaign fair for everyone who takes part. Where participation does not reflect genuine, good-faith play — including coordinated, artificial or otherwise abusive activity aimed at gaining an unfair advantage — Limitless may, at its discretion, void the XP and rewards involved and remove the participant from the Campaign.

Changes to the rules

Limitless may update these rules at any time during the Campaign, including after it has started. The version published on the official Campaign channels at any given moment is the one that applies.
